

BEFORE

Save 50% on your lighting energy costs

These savings go directly to your bottom line!

IN TODAY'S ECONOMY, ALL BUSINESSES ARE CONSIDERING WAYS TO CUT COSTS. CHANCES ARE YOU HAVEN'T CONSIDERED YOUR LIGHTING EXPENSE.

LIGHTING IS ONE THE LARGEST POWER CONSUMERS IN A FACILITY.

Cut your lighting bills in half! Switch to energy-efficient lighting and realize immediate, significant cost savings.

Half the Energy Cost and Brighter Lighting

Our high bay fluorescent lighting uses **50% of the energy** and provides **30-60% more light output** than traditional lighting, leading to brighter lighting that increases worker productivity and helps to reduce accidents. Plus, with the benefit of occupancy sensors, lighting in the areas that aren't occupied switches off automatically.

Typically, your investment will pay for itself in only 15-28 months. Why not let us perform a FREE energy audit of your facility? We'll create a customized, detailed estimate of your savings. You may even qualify for a 60 cent/psf energy tax deduction.

Each of these customers converted to HIF lighting to save energy and benefited by obtaining more light as a side benefit

MACHINE SHOP – Canton, Ohio

BEFORE

Energy Reduction 52% • Increase in Light 61%

AFTER

Removed metal halide HID's and installed fluorescent HIF fixtures 1:1. Customer benefited from a 52% energy savings. Project completed in just three days.

ASB INDUSTRIES – Barberton, Ohio

BEFORE

Energy Reduction 52% • Increase in Light 70%

AFTER

“I was pleased with the job Lighting Services did installing our fluorescent hi-bay fixtures at ASB. We will save 52% in lighting energy costs and it now seems like “daylight” in our manufacturing area.”

*Albert Kay – President
ASB Industries*

HITACHI MEDICAL SYSTEMS – Twinsburg, Ohio

BEFORE

Increase in Light 250%

AFTER

“After providing a comprehensive lighting energy audit, Lighting Services did an excellent job installing our new fixtures in a professional manner. We saw an immediate improvement in our light levels.”

*Tyler Toncler
Hitachi Medical Systems*

**QUEBECOR WORLD
Oberlin, Ohio**

BEFORE

Increase in Light 60%

AFTER

“Our facility is brighter and we have significantly reduced our energy consumption. As one of the nation's largest printing companies, we are committed to being environmentally responsible in an effort to reduce our carbon footprint.”

*Roger Starett, VP & General Manager
Quebecor World*

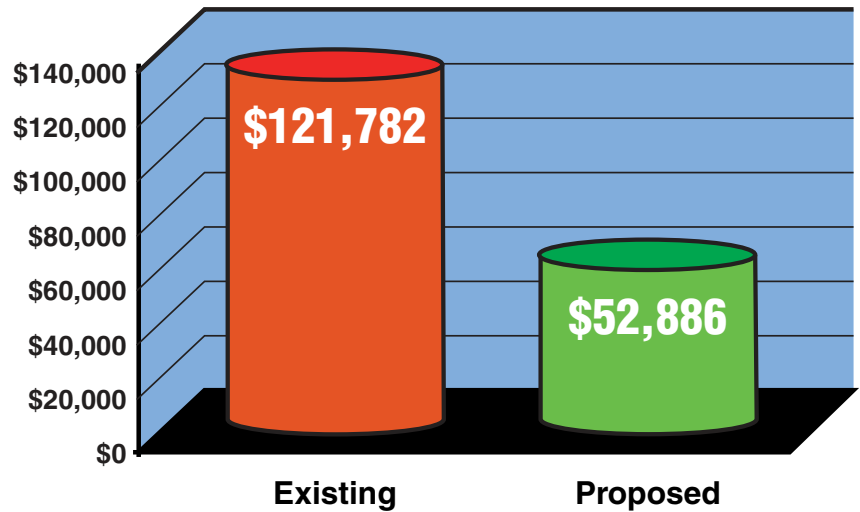

Based on before & after fixture wattages these customers will realize at least 52% in annual KWH energy savings, which directly improves their bottom line profits.

Lighting Services was featured in Crain's for our ability to save manufacturers and warehouses tens of thousands of dollars, which go right to their bottom line!

- A lighting retrofit savings initiative should not be delayed due to the economy!
- Your lighting-energy savings is not affected by the economy, your customers or reduced production.
- In contrast, your savings will help offset shrinking profits from reduced production volume.
- Your savings accrue month to month. *These dollars go right to your bottom line, with positive cash flow starting your first month.*

ANNUAL ENERGY COST COMPARISON

Term of Agreement	Monthly Energy Savings	Monthly Payment Amount
24 months	\$5,741	\$2,734

BEFORE

AFTER

FREE Energy Audit to Professional Installation

Lighting Services performs a N/C energy audit that provides you with a cost justification for the investment of retrofitting your lighting, reflecting dramatic energy savings. When you're ready to start realizing these savings, we install your retrofit lighting on time, using experienced electricians and without disruption to your operation.

Where Do the Savings Come From?

Linear high intensity, fluorescent fixtures replace 465 watt high bay light fixtures one-for-one but use only half the wattage. Based on the number of fixtures, hours of operation and other variables, we can accurately calculate cost savings and your expected ROI.

Don't Have High-Bay Fixtures?

We can upgrade your old style industrial T-12 Fluorescent strip fixtures to an energy efficient T-8 Fluorescent system for a **50-60%** energy cost reduction!

Call today to begin saving wasted energy expense.
